

Dr. Alex P. Rivera

Principal Research Scientist | Boston, MA

alex.rivera@example.com | (617) 555-0199 | github.com/arivera

Professional Summary

Research scientist with 12+ years across machine learning, distributed systems, and applied statistics. Published, patented, and shipped production ML at scale. Comfortable leading cross-functional teams.

Experience

Principal Research Scientist — Helix Labs

Boston, MA • 2019 – Present

- Founded the applied-ML group; grew it to 14 researchers and engineers.
- Shipped a recommendation system lifting engagement 18% across 40M users.
- Filed 3 patents on efficient transformer inference.
- Set the research roadmap and quarterly OKRs for the division.

Staff Machine Learning Engineer — Quanta AI

Cambridge, MA • 2015 – 2019

- Built training infrastructure scaling to 256 GPUs.
- Reduced model training cost 35% via mixed-precision and pipelining.
- Led the migration to a feature store adopted by 5 teams.

ML Engineer — Datawave

Remote • 2013 – 2015

- Developed churn-prediction models for B2B SaaS clients.
- Owned the full lifecycle from data ingestion to deployment.

Research Assistant — MIT CSAIL

Cambridge, MA • 2011 – 2013

- Worked on probabilistic graphical models for sensor networks.
- Co-authored 4 peer-reviewed papers.

Education

Ph.D. Computer Science — MIT

2007 – 2013 • Thesis on scalable probabilistic inference

B.S. Mathematics — Caltech

2003 – 2007 • Summa cum laude

Selected Publications

- Rivera et al., "Efficient Inference for Large Transformers," NeurIPS 2022.
- Rivera & Chen, "Feature Stores at Scale," KDD 2020.
- Rivera et al., "Probabilistic Models for Sensor Networks," ICML 2013.

Skills

Python, C++, PyTorch, JAX, TensorFlow, CUDA, Spark, Kubernetes, AWS, GCP, SQL, distributed training, statistical modeling.

Awards

- Best Paper Award, KDD 2020.
- Helix Labs Innovation Award, 2021.
